SecureLogic demonstrates risk-based screening of airline baggage

Aviation security provider presents at the 4th International Aviation Security Technology Symposium, Washington, DC, November 27 – December 1, 2006

NEW YORK, November 28, 2006 -- SecureLogic Corporation (OTC BB:[SLGI.OB](http://www.secure-logic.net)), a provider of software solutions for aviation security screening, will be presenting at the 4th **International Aviation Security Technology Symposium** in Washington DC on Wednesday, November 29 2006.

At the Symposium, SecureLogic will present its technology-based approach to screening of airline baggage according to designated risks and will demonstrate its state-of-the-art iScreen product suite for hold baggage screening. The presentation has been jointly prepared by Rear Admiral (ret.) Cathal Flynn, previously Deputy Assistant Secretary of Defense for Special Operations in the U.S. Navy and Associate Administrator for Civil Aviation Security at the FAA, and Shalom Dolev, who served as head of the Branch for Counter Terrorism and Sabotage for the Israel Security Agency (e-mail info@secure-logic.net for your copy).

SecureLogic has been awarded a contract by the U.S. Transportation Security Administration (TSA), to conduct a pilot deployment of iScreen software product at a major U.S. airport.

The International Aviation Security technology Symposium is a highly-reputable event in the aviation industry, under the management of the National Safe Skies Alliance, in cooperation with the U.S. Transportation Administration. This Symposium is the premier U.S. government forum specific to advancing aviation security technology, policy and procedures. The symposium is held once every five years and is conducted in cooperation with the U.S. Department of Homeland Security Directorate for Science & Technology and the Transportation Security Administration.

About SecureLogic

SecureLogic develops and markets systems that optimize the screening of bags and people through airports. SecureLogic's systems integrate unique security methodologies with state-of-the-art screening and baggage handling technologies, providing a comprehensive baggage screening and passenger screening security solution. For more information, and for a copy of the presentation, contact: info@secure-logic.net.

Statements in this press release that are not statements of historical or current fact constitute "forward-looking statements" within the meaning of the Private Securities Litigation Reform Act of 1995. Such forward-looking statements involve known and unknown risks, uncertainties and other unknown factors that could cause the actual results of the Company to be materially different from the historical results or from any future results expressed or implied by such forward-looking statements. In addition to statements which explicitly describe such risks and uncertainties, readers are urged to consider statements labeled with the terms "believes," "belief," "expects," "intends," "anticipates," "will," or "plans" to be uncertain and forward-looking. The forward-looking statements contained herein are also subject generally to other risks and uncertainties that are described from time to time in the Company's reports and registration statements filed with the Securities and Exchange Commission.
